The closest prior arts Patitucci (U. S. Pat. No. 7,035,862), discloses a method for deriving and sorting information from an information repository including data elements individually associated with corresponding records identifiers, and Neal et al. (U. S. pat. No.7, 043,492) disclose an automated classification of items using classification mapping, the invention as disclose by Neal et al. relates to comparing characteristics of an item associated with a classification system to a mapping in a knowledge base to find candidate categories into which the item can be classified. However, both Patitucci and Neal et al. taken singularly or in combination would not anticipate or render Applicant's claimed invention obvious.
